SKILLS

Languages

Java, C++(moderate),
HTML,CSS ,Javascript

Frontend Libraries

Reactjs, Gsap

Backend Frameworks

NodeJs, Expressjs

Databases

MySQL, MongoDB,Mongoose

EDUCATION

DYPIEMR, Akurdi, Pune

BE in Computer Engineering

2022-2025
Aggregate :- 8.16

KENDRIYA VIDYALAYA,CME,PUNE

CBSE CLASS XII

2021
Percentage :- 8.4

CBSE CLASS X

2016-2018
Percentage :- 9.21

PROFILE

As an enthusiastic computer engineering student , I posses wide knowledge of languages such as **JAVA, C++ and Javascript**. I am proficient in multiple development languages, including **HTML5, CSS3**, and **Javascript**. My strong communication skills enable me to effectively recommend improvements to existing software programs. Additionally, I have experience to work with databases like **MySQL**, and **MongoDB**. My experience also extends to modern frameworks and technologies such as **Reactjs, Nodejs, gsap** and **expressjs** making me a versatile and valuable asset to any development team.

PROJECTS

Fitness Exercise App

Developed a Fitness Exercise Web Application designed to recommend and display exercises for specific muscle groups. The application was built using Reactjs, CSS, HTML, and JavaScript, leveraging the RapidAPI platform to fetch exercise data. This project showcases my ability to integrate multiple web technologies to create a user-friendly and interactive fitness tool.

Profile Manager

A robust Profile Manager application built using Node.js and Express.js and mongoDB, designed to efficiently handle Create, Read, Update, and Delete (CRUD) operations for user profiles. The application provides a user-friendly interface for managing user data, ensuring seamless and secure data transactions.

Pizza Sales

This project focuses on analyzing pizza sales data using MySQL to gain insights into various aspects of sales performance, customer preferences, and revenue generation. By conducting comprehensive data analysis, the project aims to provide valuable insights that can inform business strategies and decision-making processes within pizza establishments.

Animated Webgolf

This frontend project aims to provide an engaging and visually appealing interface for a golf course website. Leveraging GSAP (GreenSock Animation Platform), it offers seamless animations that enhance user experience, particularly through scrolling effects
